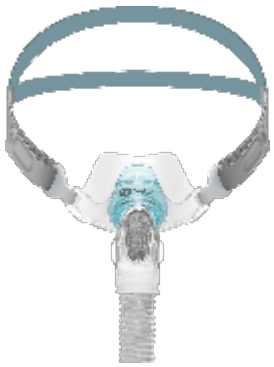
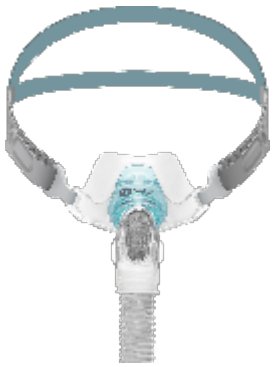
# Fisher and Paykel Brevida Nasal Pillows Mask XS-S and M-L (Two Seals)





Fisher and Paykel have followed on from their success of the Pilairo Q with the release of their new nasal pillows mask called the Brevida. This literally translates in English to ” a breathe of fresh air”. This mask has been designed for confidence and built for comfort with all the good features of the Pilairo Q but more.

The Airpillow system inflates to form a gentle pillow of air and seals in and around the nose. The extra soft pillows have a sealing region made of extra-thin (0.25mm)  soft silicone which provides a gentle seal. The versatile pillow geometry allows this mask to fit a wide range of nostril sizes. The stabilising side supports on the pillow are designed to reduce the likelihood of the seal dislodging during sleep. The mask also has 2 different sizes which allows for personal adjustment when needed.

The new headgear is adjustable and thin which allows the patients to adjust the headgear to their personal needs.

The washable diffuser allows for a reduction in noise from the exhalation port. this also prevents gusts of air being directed towards your partner during sleep. This is washable and can be reused many times.

VisiBlue allows for the highlighting of the mask key components and assist patients with daily use.

All sizes are included in the packet and are Extra Small / Small and Medium / Large
