

ResMed AirFit N30i

The ResMed AirFit N30i nasal cradle mask sits under your nose and features a top-of-the-head tube design that makes it easier to sleep in any position. With this mask red marks and discomfort will be a thing of the past. You can now enjoy the freedom to move in your sleep with no front-end tube in the way.

AirFit N30i Features:

- Quick Release Elbow – allows for flexible movement and connection.
- Self-adjusting SpringFit frame – designed for a broader fit range and to stay comfortably in place all night.
- Integrated soft sleeves – designed for built-in comfort.
- Integrated chassis – created to provide additional support.
- Curved cushion design – cradles the nose for added comfort and stability that is less intrusive.
- No coverage over the nasal bridge means you can wear your glasses comfortably to read or watch TV.
